

Young Professional Stewardship Grant

DESCRIPTION

In February 2023, Calgary will host an important gathering devoted to landscape and species at-risk conservation in western Canada.

The 13th Prairie Conservation and Endangered Species Conference will bring together decision makers, scientists, researchers and community and grass-roots groups along with farmers, industry representatives, Indigenous groups and other private citizens who have an abiding interest in sustaining prairie land, water, plants and animals.

The theme of the 13th Prairie Conservation and Endangered Species Conference is:

“Prairie Collaboration, Connection, and Conservation (PC3)”

The Young Professional Stewardship Grant was developed to promote future work to achieve success with prairie conservation and endangered species management. The Young Professional Stewardship Grant is for professional or aspiring conservationists between the ages of 18-30 who live and/or work in Manitoba, Alberta or Saskatchewan. Applicants from various disciplines are encouraged to apply and do not need to be enrolled in, or a graduate of, an academic institution.

The Young Professional Stewardship Grant seeks innovative proposals which advance the “engagement” of people in conservation in Grassland and Parkland Natural Regions of the Prairie Provinces. Proposals may consider topics in the areas of land management, ecology, species at risk, or habitat enhancement, with a focus on education and community outreach, a desired outcome, or the use of an integrated management approach. Proposals should take into consideration and avoid unintended consequences, whereby the project may benefit one species at the detriment of another species. Projects should also demonstrate some kind of socio-economic benefit.

Individuals and/or groups are encouraged to submit a proposal to be considered for grant(s), the funds for which will be raised during the Silent Auction at the 2023 Prairie Conservation and Endangered Species Conference and through specific sponsorship support. The grant recipients will be announced at the conference banquet on February 23rd, 2023. There may also be an opportunity for the winning applicant(s) to present the results of their projects at the conference.

The deliverables expected from the winning projects include: an interim report, a final report, and a poster.

Visit our website at www.pcesc.ca for more information about the conference, including conference agenda, registration information, and sponsorship opportunities.

Guidelines

Who can apply: Young professionals between the ages of 18 – 30 years living and/or working in the provinces of Manitoba, Alberta or Saskatchewan. Proposals may be submitted by individuals, partners, or groups. **Applicants are not required to be enrolled in, or be a graduate of, an academic institution.**

Grants awarded: Up to three (3) individual grants awarded totaling \$7,500.00* (\$2,500.00 each); 80 percent will be received upon proposal award and the remaining 20 percent will be delivered upon project completion after the final report has been submitted.

How to apply: Fill out the Application Form and submit to

Amanda MacDonald

PCESC 2023 Social and Awards Committee Member

amanda.macdonald@ab-conservation.com

Judging: An awards committee will review all applications and select winners.

Important Dates to Remember:

- Application and Proposal Submission Deadline: January 11th, 2023
- Grant Winners Notified: January 27th, 2023
- Grant Agreement Executed: March 31, 2023
- Project Implementation: prior to October 31, 2023
- Interim Report: December 31, 2023
- Final Report Submitted: December 31, 2024

Mandatory Criteria:

1. Focus on the theme of “Prairie Collaboration, Connection, and Conservation”
2. Community involvement/extension component
3. Innovative
4. Includes/identifies socio-economic benefits
5. Project conducted in the native grasslands, rangeland, or parkland regions of Manitoba, Alberta or Saskatchewan

Optional Criteria:

- Demonstration site
- Signage
- Improve and/or enhance habitat for Species at Risk/general wildlife
- Improve range health or riparian health
- Collect baseline ecological data at project site
- Monitoring
- GIS mapping

* Please note that funds raised from the Silent Auction will be used to support this Grant program, therefore the number of \$2,500.00 Grants will be determined by the amount raised. We are anticipating a minimum of one (1) Grant award with up to three (3) being available
