

Robyn Anderson

Robyn Anderson resides in Southern Alberta where she was born and raised. She is a self taught artist with a love for oil paints, but has been known to dabble in watercolour, acrylics, graphite pencil, and resin. Her work features a wide variety of subject matter and artistic styles, from landscapes to fantasy art, which she attributes to her gift of neurodivergence. In her work life, Robyn is an environmental scientist and Professional Biologist. She has always had a love for nature and attributes much of her inspiration to the prairie landscapes she encounters. Robyn looks at the natural world much in the same way as a painting: up close, you can see the small details, brush strokes, and textures, but as you step back the 'bigger picture' comes into view.
